

## INSTRUCTION MANUAL

### WARNINGS!

- Only connect the power cord after your XOUNTS is fully assembled.
- Only use LED bulb with you XOUNTS, or bulbs with a maximum of 11 watts.

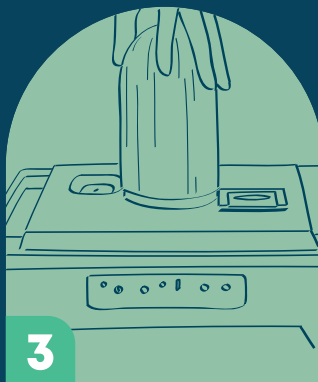

1

Connect the power cord to the base of the unit

2

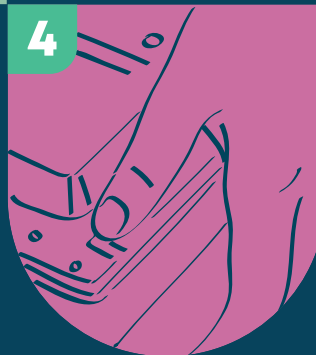

Screw in the light bulb

3

Secure the bulb case over the light bulb

If you have any of the optional peripherals, now is the time to connect them! See separate instructions.

4

Unlock the 4 slide locks on the sound base

5

Unfold the sound panel and insert it into the grooves of the sound base

Open panel should be on same side as control panel!

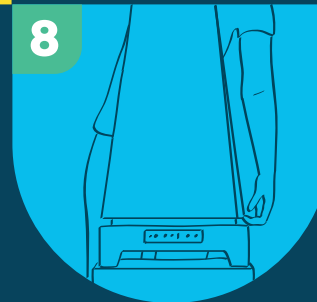

6

Lock the 4 slide locks!

7

Plug in the 2 sound panel jacks, red to red and white to white

8

Unfold your Xounts skin and place it over the sound panel

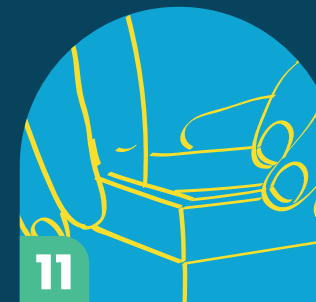

9

Place the sound base firmly over the base, securing the Xounts skin

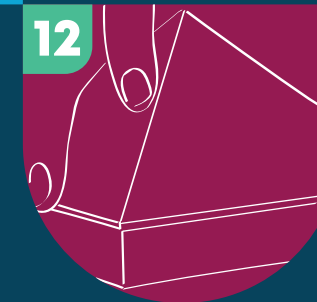

10

Bend the top flaps of the Xounts skin inward and secure it in place with the top case frame

11

Fasten with hand screws

12

Snap on the magnetic top case!

13

You're ready to get connected! Press the on button, and then simply plug in your device using the 3.5mm jack, or if you're using Bluetooth, pair your device and let the music play!
